Seeking an entry-level opportunity to build userfriendly, SEO-optimized, and performance-driven web applications while continuously learning modern frontend technologies.

Skills(Technical & Soft):

Languages: HTML5, CSS3, JavaScript(ES6+).

Frameworks/Libraries: React, Tailwind CSS, Bootstrap5 Tools:

Git, GitHub, npm , webpack.

Concepts: Responsive Design, REST APIs , Accessibility.

Soft Skills :Problem-Solving, Communication, Teamwork, Eagerness to Learn

Project

- To-Do Web Application (Jan 2025 - May2025)

Built a responsive Todo web application using React, implementing **CRUD** functionality (create, read, update, delete) for tasks. Used React's useState and useEffect hooks to manage state and persist data (e.g. in localStorage). Added features to mark tasks as complete/incomplete, filter tasks by status, and delete unwanted tasks. Ensured UI is clean, intuitive and works across different screen sizes. Learned componentbased architecture, event handling, and conditional rendering through this project.

GitHub :-https://github.com/Kartikmagar111/To-Do-Project.git

- Portfolio Web App (June 2025 – Sep 2025)

Built a personal portfolio using React, showcasing my skills, projects, and contact info. Implemented multiple functional components (e.g. Navbar, About, Projects, Skills, Contact) for clean structure and reusability. Added responsive design to ensure it works well on mobile & desktop. Deployed using GitHub (or Netlify/etc.). Focused on UI/UX, component-based architecture, and polished styling.
